

The Campbell Ultrafiltration  Whole House System is professionally installed where the water line enters your home. MicronGuard™ filtration technology provides your family with industry-leading protection from harmful contaminants.

Model #:
ULFILTR20PLUS
ULFILTR10PLUS
4.5" configuration available

SAFE, CLEAN WATER AT EVERY SOURCE IN YOUR HOME.

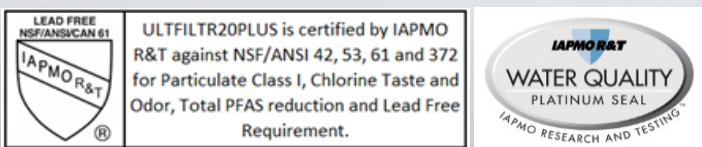

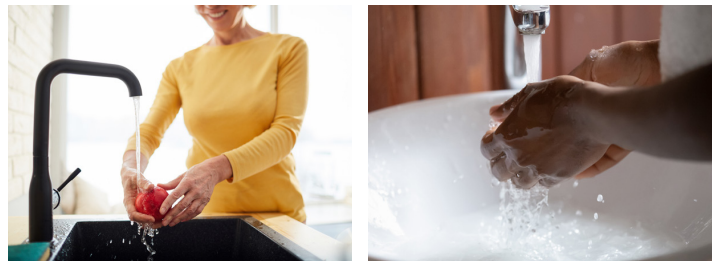

Is your filtration system providing enough protection from harmful contaminants in drinking water? There are new concerns everyday about something in water that shouldn't be: heavy metals, bacteria, viruses, forever chemicals.

This is the only system currently on the market to meet the NSF/ANSI 53 2022 standard for PFAS/Forever Chemicals reduction at 20ppt.

The Campbell Ultrafiltration  Whole House System, provides clean safe water at every source in your home. Never worry about the water in the tub or the water used to wash your dishes. It's all safe.

We say plus after ultrafiltration for a reason, this system removes more than standard ultrafiltration. This technology was developed and proven in the medical and dental industries where safety is vital. Now available for the first time for home use.

Maximum protection for the whole family.

SEE THE REVERSE SIDE FOR DETAILS ON HOW IT WORKS...

WHAT DOES IT DO?

Filtration abilities beyond Ultrafiltration without a pressure drop, this POE system insures safe, clean water at every source in your home. This small, (2.5" x 10" and 20" models) yet mighty system, brings cutting-edge filtration technology, proven in the medical and dental industries, to your home.

REDUCES

- ◆ Bacteria **99.99%**
- ◆ Viruses **99.99%**
- ◆ Cysts **95%**
- ◆ Forever Chemicals **95%** PFAS (PFOA, PFOS, PFHxS, PFNA, PFBS, PFDA)
- ◆ Heavy Metals **≥85%** (Lead, Copper, Iron)

REDUCES

- ◆ Pharmaceuticals
- ◆ Microplastics
- ◆ Particulate
- ◆ Chlorine
- ◆ Scale

AND MORE

- ◆ No wastewater discharge
- ◆ Improves taste & odor
- ◆ No added salt
- ◆ Keeps Calcium & Magnesium in drinking water
- ◆ Certified to NSF/ANSI 42, 53, 61, and 372
- ◆ Designed and assembled in the USA
- ◆ Flow rate of ≥8 GPM (2.5"x 20")
- ◆ Meets 2022 PFAS reduction standard at 20ppt

3-STAGE POINT OF ENTRY SYSTEM REMOVES HARMFUL CONTAMINANTS. LEAVING SAFE CLEAN HEALTHY WATER

HOW DOES IT WORK?

MicronGuard™ enhances the filtration ability of the filter. The base media was developed for NASA space vehicles. Simply put, it uses nanotechnology to remove far smaller things from water than any filter alone would be capable of while maintaining the flow rate.
